DISCOVER...

Your True Colors

In this journey, we will explore *what* colors have shaped your life and *where* their meaning can amplify into an exquisite manifestation of your gratitude, love and joy. Take a minute to think about your answer to every question below, then write it down...

>>> Take a look around you. What colors do you notice in your life?

>>> What colors bring out your gratitude, love and joy?

>>> Which colors come to mind in your relationship with your loved one?

>>>>> *physically (on clothes, furniture etc)*

>>>>> *metaphorically (colors that define your relationship)*

>>>>> *experiences (colors were a part of shared experience)*

The Perfect Gift

your personal object, magnifique!

* We work only with the finest quality gemstones! Selections for the "A Color Story" perfect gift are selected precisely for their strength as color expressions. If you had your heart set on a specific stone, which is NOT on this list, we can certainly accommodate it (by special request).

** **ALEXANDRITE** - A very rare color changing stone that is so striking that its dramatic shifts are called the "Alexandrite effect". This expression varies within the color fields of reds, purples and blues with a splash of X. It's a phenomenal gemstone which we love to recommend as a highlight for this package precisely because of its intense color changing effect.

*** **STAR SAPPHIRE** - A celestial blue like no other. The sapphire is the epitome of elegance, a gemstone linked to the planet Venus and to Friday (a day dedicated to the goddess Venus). It is representative for the month of September and covers the zodiac signs of Taurus and Gemini. In ancient times it was believed that sapphire taps the power of the "third eye" and that it has the ability to influence spirits.

**** **STAR RUBY** - The Gemstone of Kings! Ruby is associated with power, wealth and the protection that comes from the two. It is believed that this gem helps its owner acquire more gems - a good tip if you plan on starting a collection! Known for its unique asterism, the six-rayed star effect appears most clearly under natural light. This asterism brings focus to the intense red.
